

## How to find a LOMC

A LOMC (Letter Of Map Change) is a letter which reflects an official revision to an effective Flood Insurance Rate Map. LOMCs are issued in place of the physical revision and republication of the effective map.

The MSC has LOMCs available for online viewing using Adobe Acrobat Reader. When a map panel listing is displayed as a result of a Catalog query, Map Search, or Quick Search you will see a "plus sign" next to the view button if LOMCs exist for that panel. Clicking on the "plus sign" will expand the list of LOMCs for that panel. You may click the view button next to a LOMC to view it using Adobe Acrobat Reader.

**Note:** Online viewing is only available for LOMCs in digital form. The MSC has digital LOMCs issued from June 1, 1997 through March 31, 2010. For a listing of LOMCs older than June 1, 1997 please contact the MSC.

### There are 3 ways to find a LOMC:

#### Find a LOMC by Case ID

Use this option to find a LOMC if you know the Case ID. Enter up to 8 LOMC case IDs, then click the Search button. Information for the LOMCs will be displayed in the search results.

#### Find a LOMC by Map Panel ID

Use this option if you know the map panel ID(s) but not the LOMC case ID. Enter up to 8 map panel IDs, then click the Search button. Information for the maps will be displayed in the search results. If any LOMCs are available for the map panel, a "plus sign" will appear in the LOMC column. Click the "plus sign" to see the list of LOMCs for the map panel.

#### Find a LOMC by State/County/Community

Use this option if you only know the community that the LOMC is in. After you select a state, county and community, a list of all of the map panels for the community will be displayed. A "plus sign" will appear in the LOMC column for map panels that have LOMCs. Click the "plus sign" to expand the list of LOMCs for the map panel.
